Summary

Front-end developer skilled in building responsive and user-friendly web applications using HTML, CSS, JavaScript, and React. Experienced in modern UI/UX design, API integration, and optimizing performance for better user experiences. Passionate about learning new technologies and collaborating in dynamic development teams.

Education

Cairo University, BS in Computer Science   *Oct 2023 – Jul 2027*
(Expected)

- **Coursework:** Data Structures, OOP, Software Engineering, Algorithms

Experience

Software Engineer Intern, Procore – Cairo   Aug 2025 – Nov 2025

- Collaborated with the team on 20+ tickets as a Full-Stack Web Developer, contributing to both front-end and back-end tasks
- Gained hands-on experience with GitHub workflows, including pull requests, reviews, and merges
- Strengthened understanding of core software engineering concepts and applied them in real-world scenarios
- Enhanced coding practices with a focus on clean code principles and maintainability
- Improved soft skills through teamwork, communication, and cross-functional collaboration

Projects

Weather API

- A responsive weather app built with ReactJS and OpenWeather API, designed for all cities. Features include weekly forecast flip cards, dynamic backgrounds based on conditions, and daily weather tips.

Kanban

- Developed a Kanban-style task management web application using React (Vite), Tailwind CSS, and Drag-and-Drop (Dnd Kit). The project allows users to create, update, and organize tasks into multiple columns.

BlogIt

- A full-featured blog application built using Python, Django, and Bootstrap, allowing users to explore, read, and manage articles with ease.

Skills

Technical: HTML, CSS, Bootstrap, Tailwindcss, JavaScript, TypeScript, React, Redux, Django, python, Git, DnD kit, API integration, SQL, Ruby, Ruby On Rails

Soft: Teamwork, Communication, Problem Solving, Time Management, Adaptability, Jira

Languages

Arabic: Native
English: Fluent
